DETAILED ACTION

1. Applicant's arguments filed January 5, 2009, have been fully considered.
2. Claims 1, 4-6, 9-13, and 16-19 are pending and have been examined. Claims 2, 3, 7, 8, 14, and 15 have been canceled.

Response to Amendment

3. Applicant's arguments with respect to the prior art have been considered but are moot in view of the new ground(s) of rejection.

Information Disclosure Statement

4. It is noted that no Information Disclosure Statement has been filed on this application.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1, 4-6, and 9-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1 and 4-5 are directed to a system (apparatus) however, the limitations consist of software not tangibly embodied on a hardware element. Claim(s) 6 and 9-12 is/are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to particular machine, or (2) transform underlying subject matter (such as an article or material) to a different state or thing. See page 10 of In Re Bilski 88 USPQ2d 1385. The instant claims are neither positively tied to a particular machine that

Art Unit: 2436

accomplishes the claimed method steps nor transform underlying subject matter, and therefore do not qualify as a statutory process. The method including steps of ... is broad enough that the claim could be completely performed mentally, verbally or without a machine nor is any transformation apparent.

Allowable Subject Matter

7. Claims 1, 4-6, 9-13, and 16-19 would be allowed if amended to overcome the 101 rejection above.
